## REQUEST FOR SATELLITE DISH INSTALLATION

This form is to help homeowners select the best location for receiving a good signal from a satellite dish while hiding the dish from view as best as is possible. To begin, it may be a good idea to read the standards for dish installation in the front of the Charbonneau directory. Under FCC regulations, homeowner associations may require homeowners to move satellite dishes if a less visible location with a comparable signal is found. Your CCC Architectural Control Committee has prepared this form so the installation of your dish is done to your satisfaction **and** meets the architectural guidelines as specified in the Charbonneau Country Club directory.

Be aware that most satellite dish installers do not care about aesthetics or property values in our community. Their goal is to get the job done as quickly as possible with little or no thought to appearance. Locations that provide good signals **and** obscure dishes from view are often easy installations too. To help homeowners meet both of these objectives, Charbonneau Country Club has trained personnel who can find such locations. This service is free to homeowners. Finding an appropriate location a few days prior to dish installation gives the homeowner more knowledge in dealing with the installer. This should give the homeowner:

- the best signal strength
- installation cost efficiency
- maintenance efficiency
- a means of preserving property values (both yours and others)
- a way to meet the guidelines of architectural control from the start
- 

To help get all of the above accomplished, please provide the following information to your Home Owners Association:

Property Owner's Name: _____	Date: _____
Address: _____	Phone: _____
Email: _____	Expected date of installation: _____

Please submit this form at least 10 DAYS prior to the expected date of installation to your homeowners association architectural control committee or other appropriate agent (i.e. property manager).  
If you have questions, contact Rick Schram at 1-360-771-7998.
